REVOX, Inc. Awarded Outstanding Score in Vision Systems Design 2023 Innovators Awards Program

Kanagawa, Japan, May 22th, 2023 - REVOX, Inc. announced today that its SLG-150V-NIR series was recognized among the best in machine vision today by the judges of the Vision Systems Design 2023 Innovators Awards Program. The judging panel consisted of esteemed experts from system integrator and end-user companies.

“The Vision Systems Design team would like to congratulate REVOX, Inc. for their score in the 2023 Innovators Awards Program,” says Linda Wilson, Editor in Chief. “Each year this unbiased and increasingly competitive program aims to celebrate the most innovative products and systems in machine vision. The REVOX, Inc. team should be very proud.”

About Vision Systems Design

Published since 1996, Vision Systems Design is a global resource for engineers, engineering managers and systems integrators that provides comprehensive global coverage of vision systems technologies, applications, and markets. Vision Systems Design’s magazine, website (www.vision-systems.com), email newsletters and webcasts report on and analyze the latest technology and business developments and trends in the worldwide machine vision and image processing industry.

About the Vision Systems Design 2023 Innovators Awards

The Vision Systems Design 2023 Innovators Awards program reviews and recognized the most innovative products and services in the vision and image processing industry. Criteria used in the Innovators Awards ranking included: originality, innovation, impact on designers, systems integrators, and end-users; fulfilling need in the market that hasn’t been addressed; leveraging a novel technology; and increasing productivity.
